

## THE SPECULATIVE MARKETS.

Good Weather and Excellent Crop Conditions Cause a Weakness in Wheat.

## A GOOD ADVANCE IN CORN VALUES.

## Hutchinson's Trades Taken Care Of—No Activity in Provisions—Hog Receipts Light and Prices Ten Cents Higher.

CRAIGHEAD.—Wheat was slightly weak on the curb before official trading began, but the announcement that Congdon & Co. would assume all of Hutchinson's trades made operators forget the bearish news and gave the official market better tone. The causes for the first bearish feeling were lower Liverpool cables, fine weather throughout the country, and a slight advance in wheat. As the day advanced it was evident that there and several others of the elevator people were buying in their short May in order to avoid delivering on May contracts tomorrow and during the balance of the month. The bear crowd also seemed disposed to look for higher prices. Bloom, Remond, Cudahy and Boosie were all buying July quite freely. Small traders of the professional sort were inclined to look for a break in prices and did not mind a little loss. In addition, more shares of *Sugar*, common for July dividend, More gold was ordered. The posted rates for bond market were active and strong. The natural features of the market were Readings issues, Oregon Improvement, and Kansas City, all getting higher and advanced sharply. Wisconsin Central incomes were also strong and advanced over 2 per cent.
